

Investigation Of The Status Of Security Management 2011

**Public Administration Organizations** 

we protect your digital worlds

#### Status of Information Security Management

#### **Answering the question**

- What is the current status of Information Security Management in Slovakia?
- The survey focused on security management outside the technological context

### Survey was realized in the May – August 2011 period

- •Form: online questionnaire, 23 questions
- Respondents: 242 organizations
- •Return rate: 41%
- •From which the ratio of Public Administration Organizations: 25%

### **Evaluation of questions by respondents**

- Many of the respondents expressed satisfaction and pointed out the usefulness of the survey.
- The questionnaire was described as pragmatic, focused on the topic, tactful and useful.

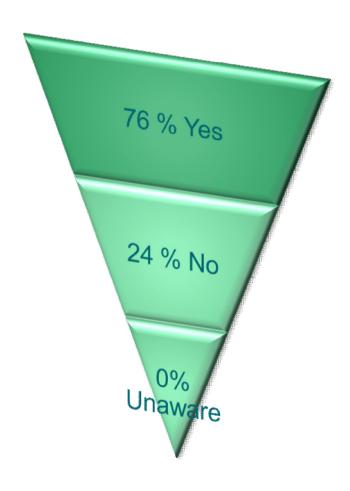

#### Purpose of Information Security Management

The essence of Information Security
Management is to achieve the
required level of security while
optimizing the use of the required
resources. The management utilizes
practices, procedures and knowledge,
which is internal, or in accordance
with the requirements of local or
global norms. An example of a
practice applied world-wide is the
PDCA cycle, that is also part of the
ISO/IEC 27001 standard.

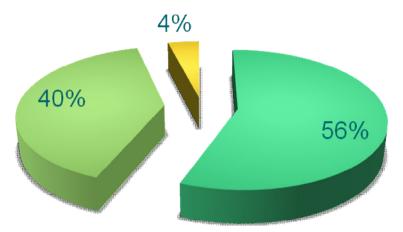

## Systematic Management of Information Security Using a Standardized Management Process

Respondents are persons responsible for information security of a liable person (Act No. 312/2010 Coll., § 28c))

#### **Documenting Information Security Management**

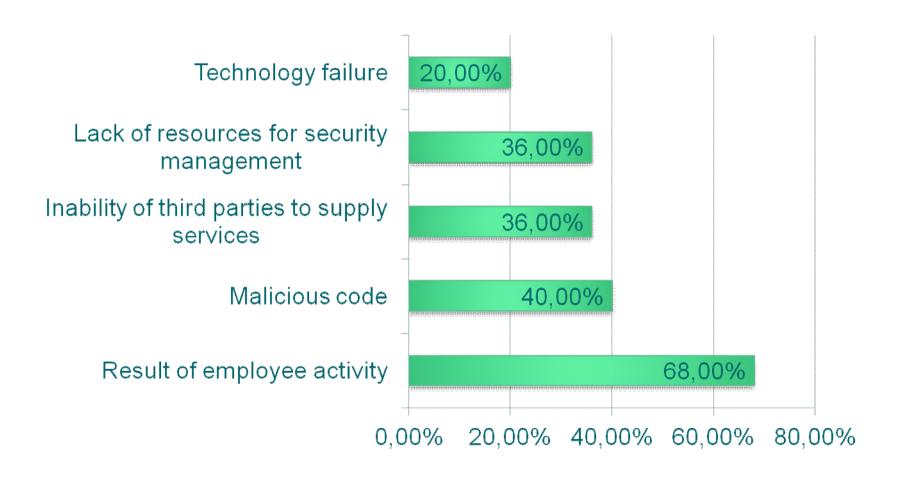

- Yes, the system of management is standardized
- Only partially, some of its aspects
- Not at all

Indicates possible absence of replicable and sustainable Information Security Management, according to 44% of the respondents, the real management output is thus questionable.

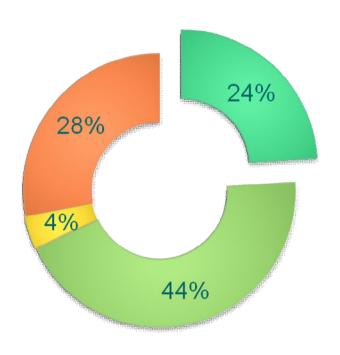

# Major Reasons for Occurrence of Security Incidents

#### Increasing Employee Security Awareness

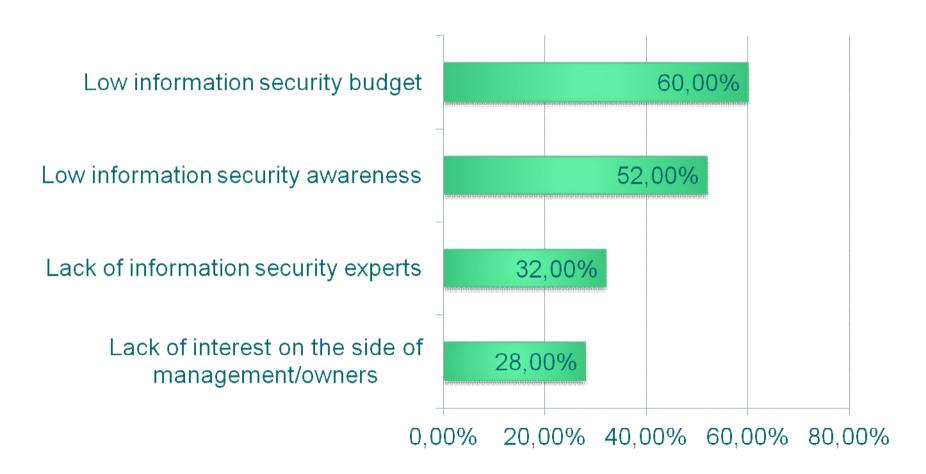

The most widespread risk causing the majority of security incidents is neglected due to the absence of a systematic approach.

- Yes, employees are systematically educated
- Only when recruiting new employees
- Only in reaction to security incidents
- No information security trainings are organized

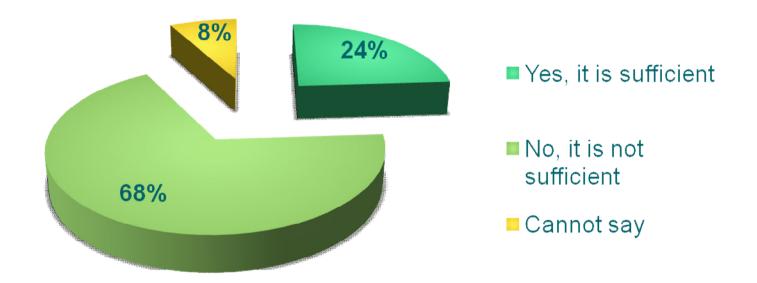

## Reasons Preventing Growth of Information Security Management

#### Number of Employees Dedicated to Information Security

#### Summary / Room For Thought

Insufficient security budget and lack of industry experts can make compliance with Act No. 275/2006 Coll. on Information Systems at Public Administration as amended questionable and also can lead to negative impacts due to security incidents.

Can financial issues and lack of professional personnel be solved?
