

Progress in reaching the Digital Agenda targets in Slovakia

Luis Rodríguez-Roselló

Head of Unit DG CONNECT unit E1: Network Technologies

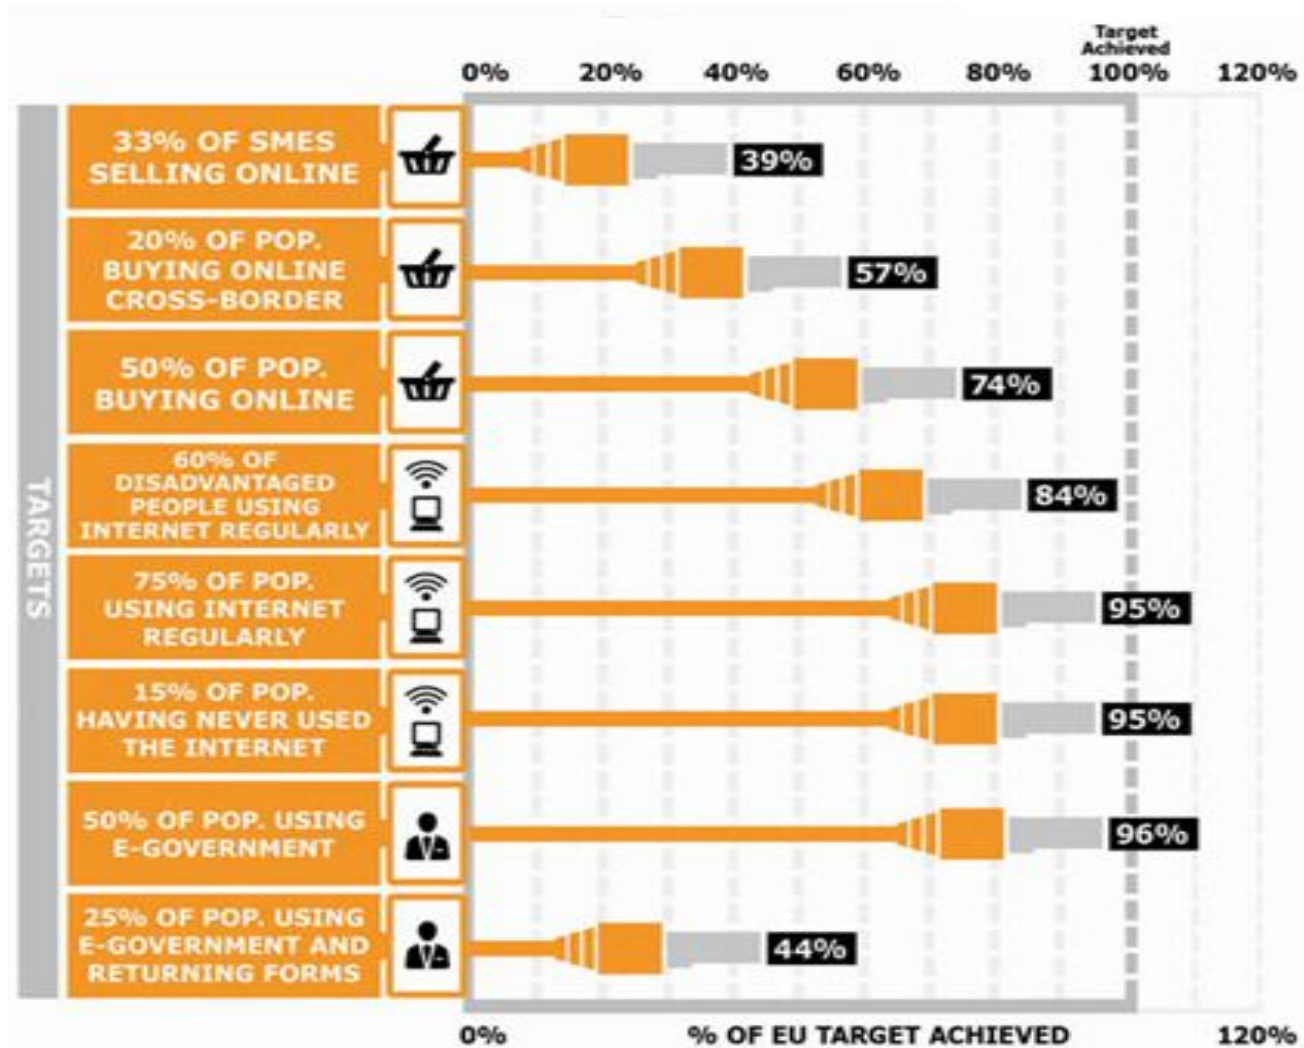

ITAPA International Congress: Wednesday 24/10/2012

The Crown Plaza Hotel, Bratislava

Session: Digital Agenda for Europe: progress and plans

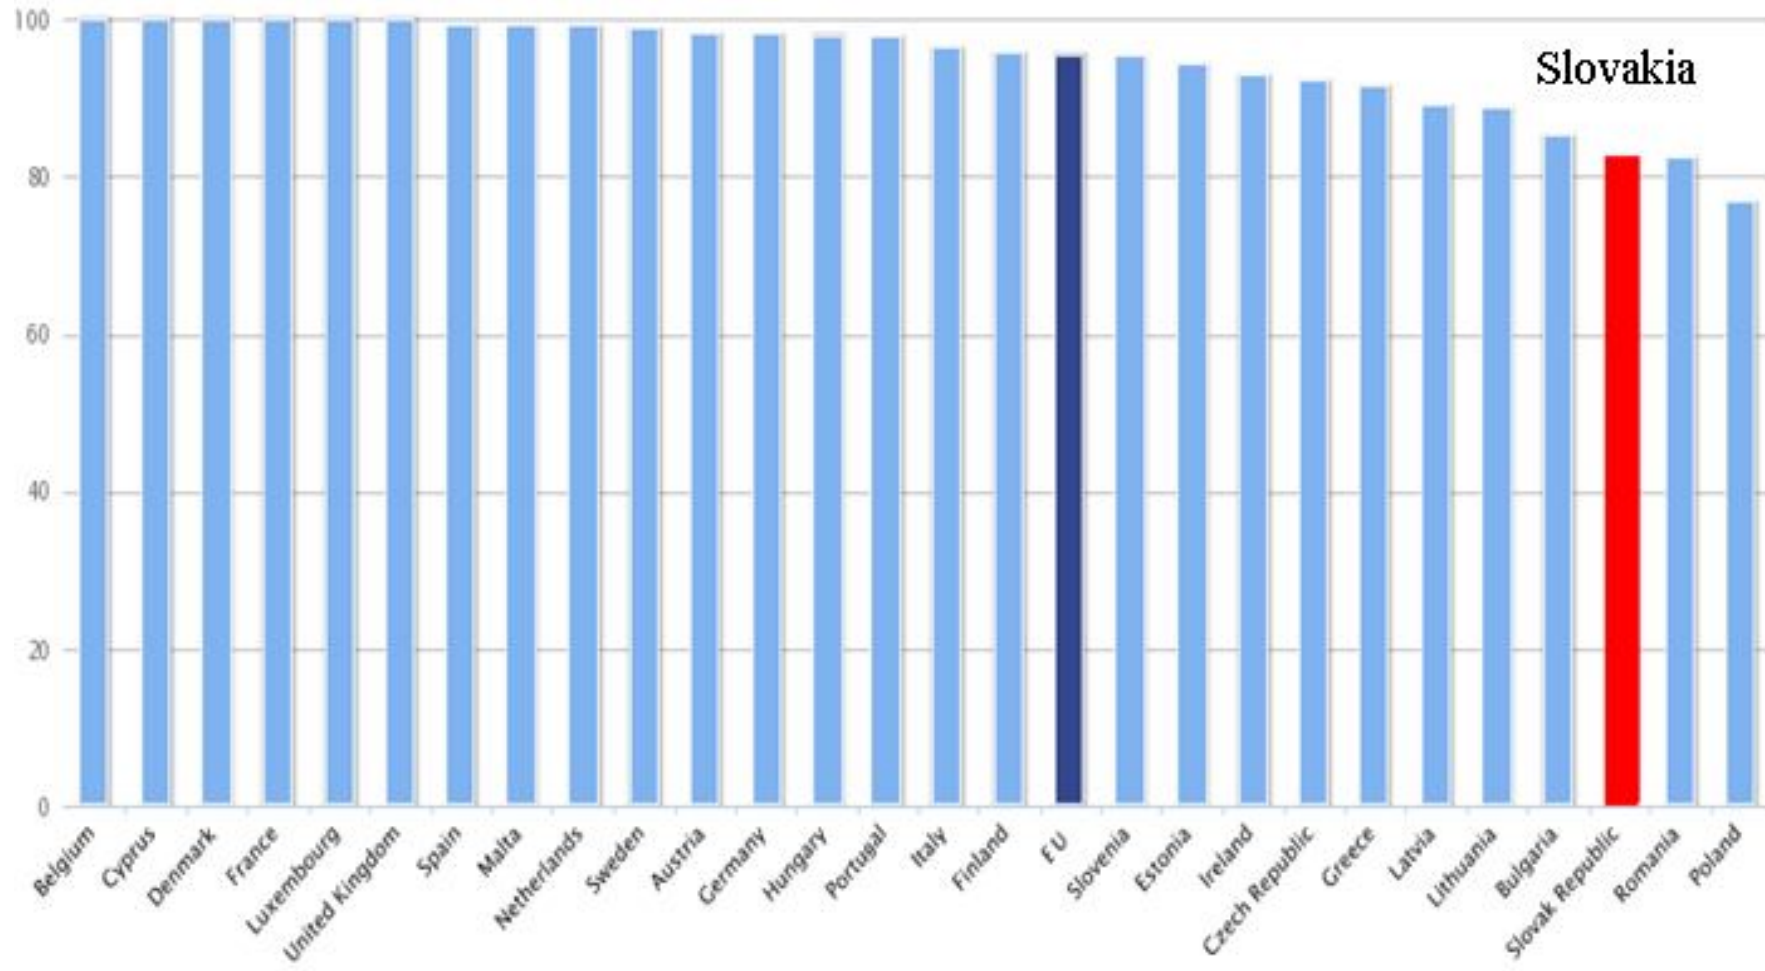

Slovakia: general view on Digital Agenda

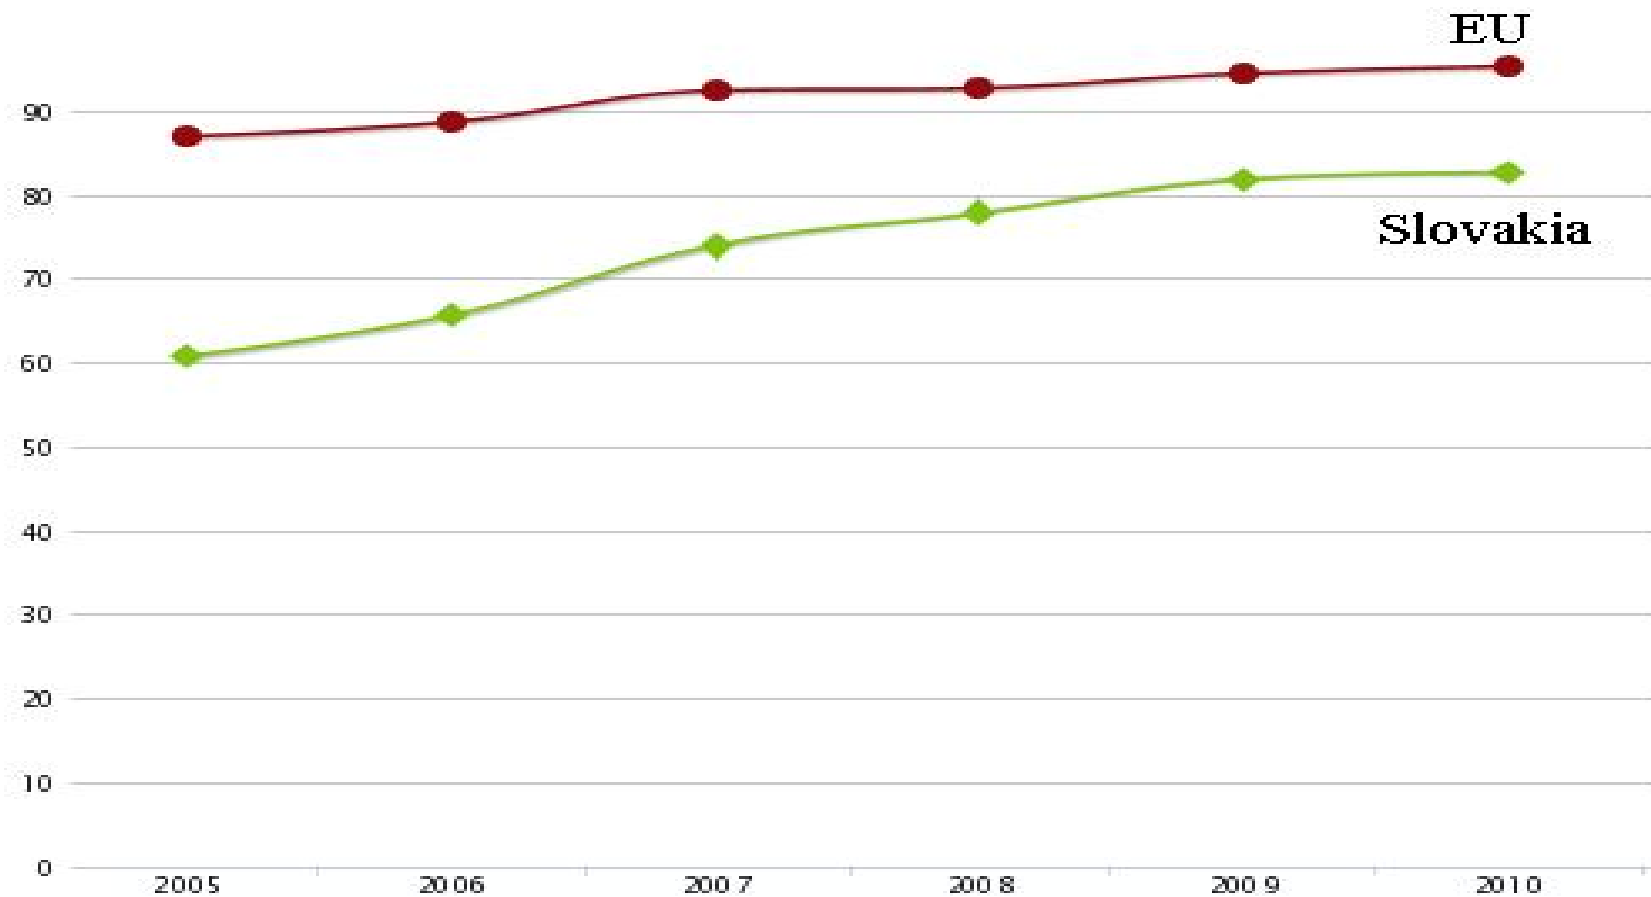

Fixed broadband coverage

Slovakia at 83%

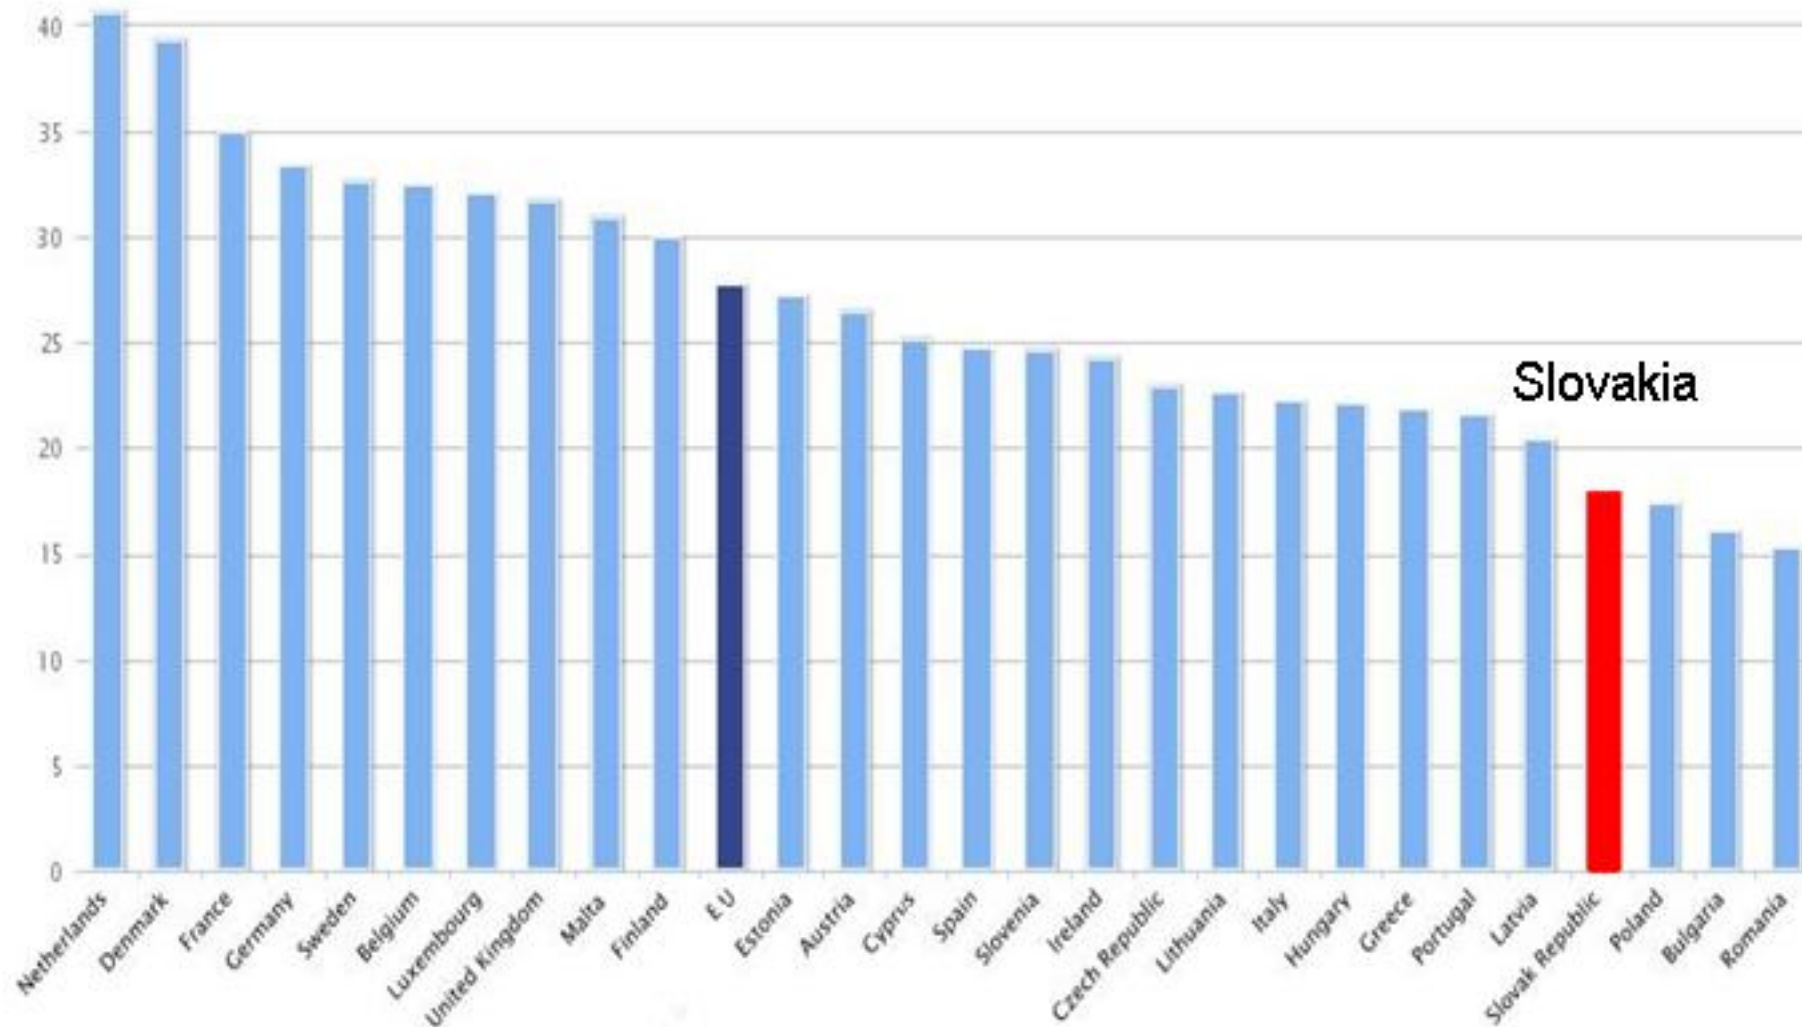

Fixed broadband coverage

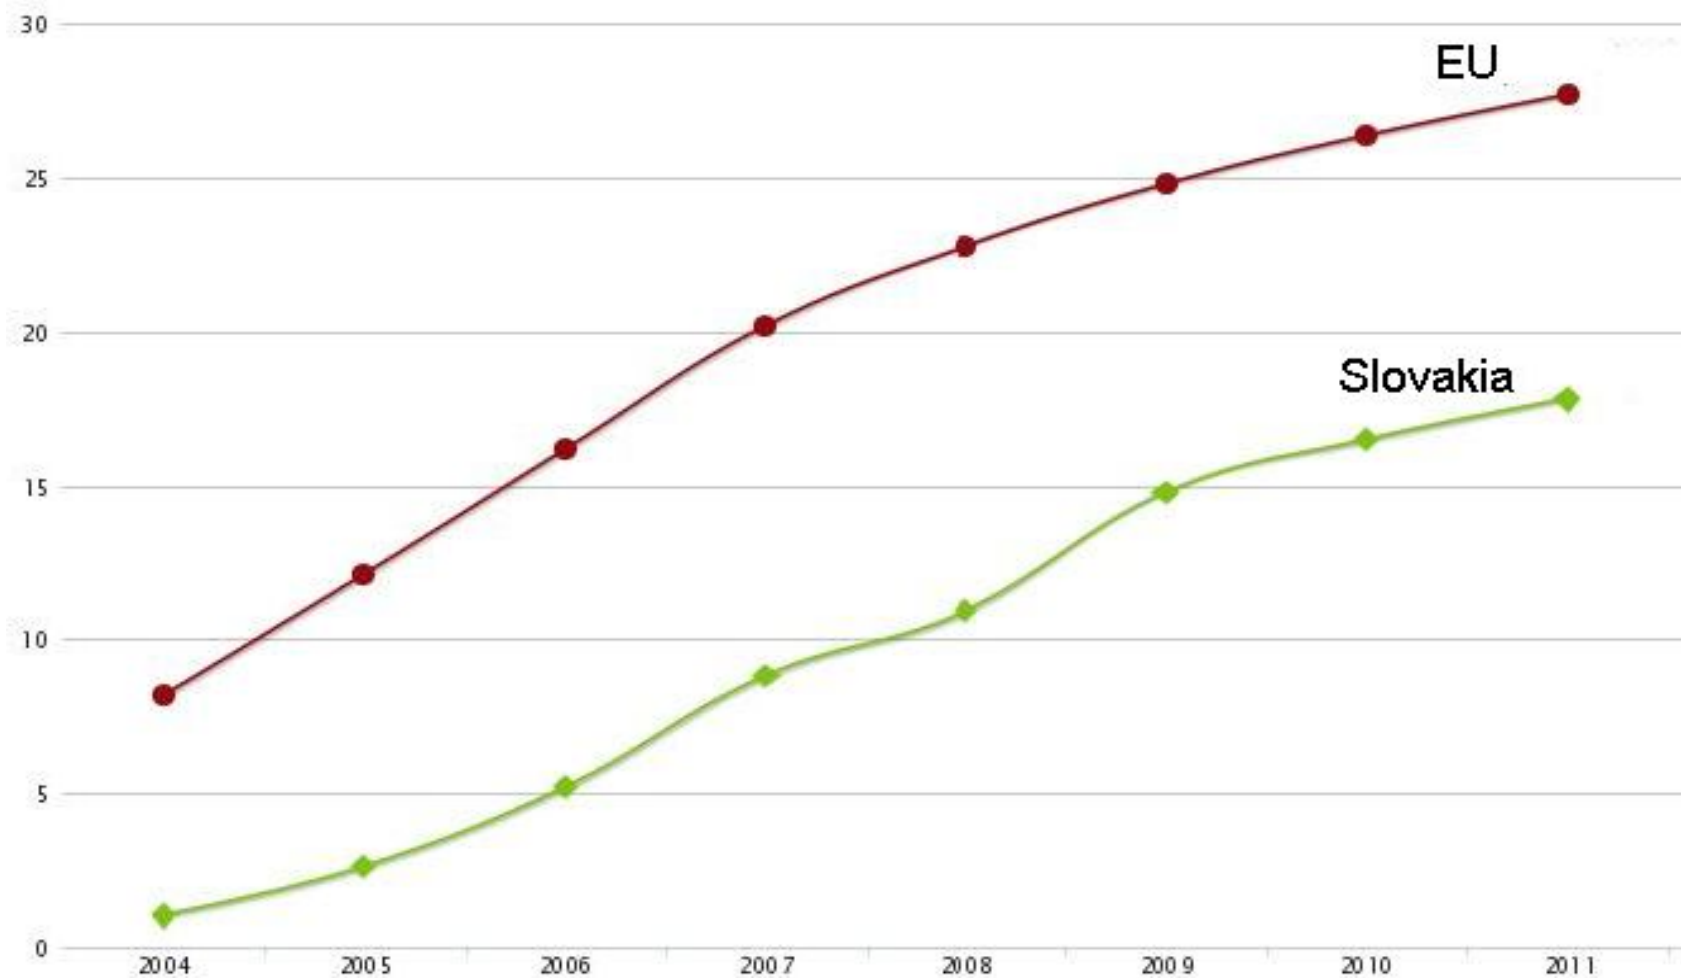

Broadband take-up (lines/100 people)

Slovakia at 17%

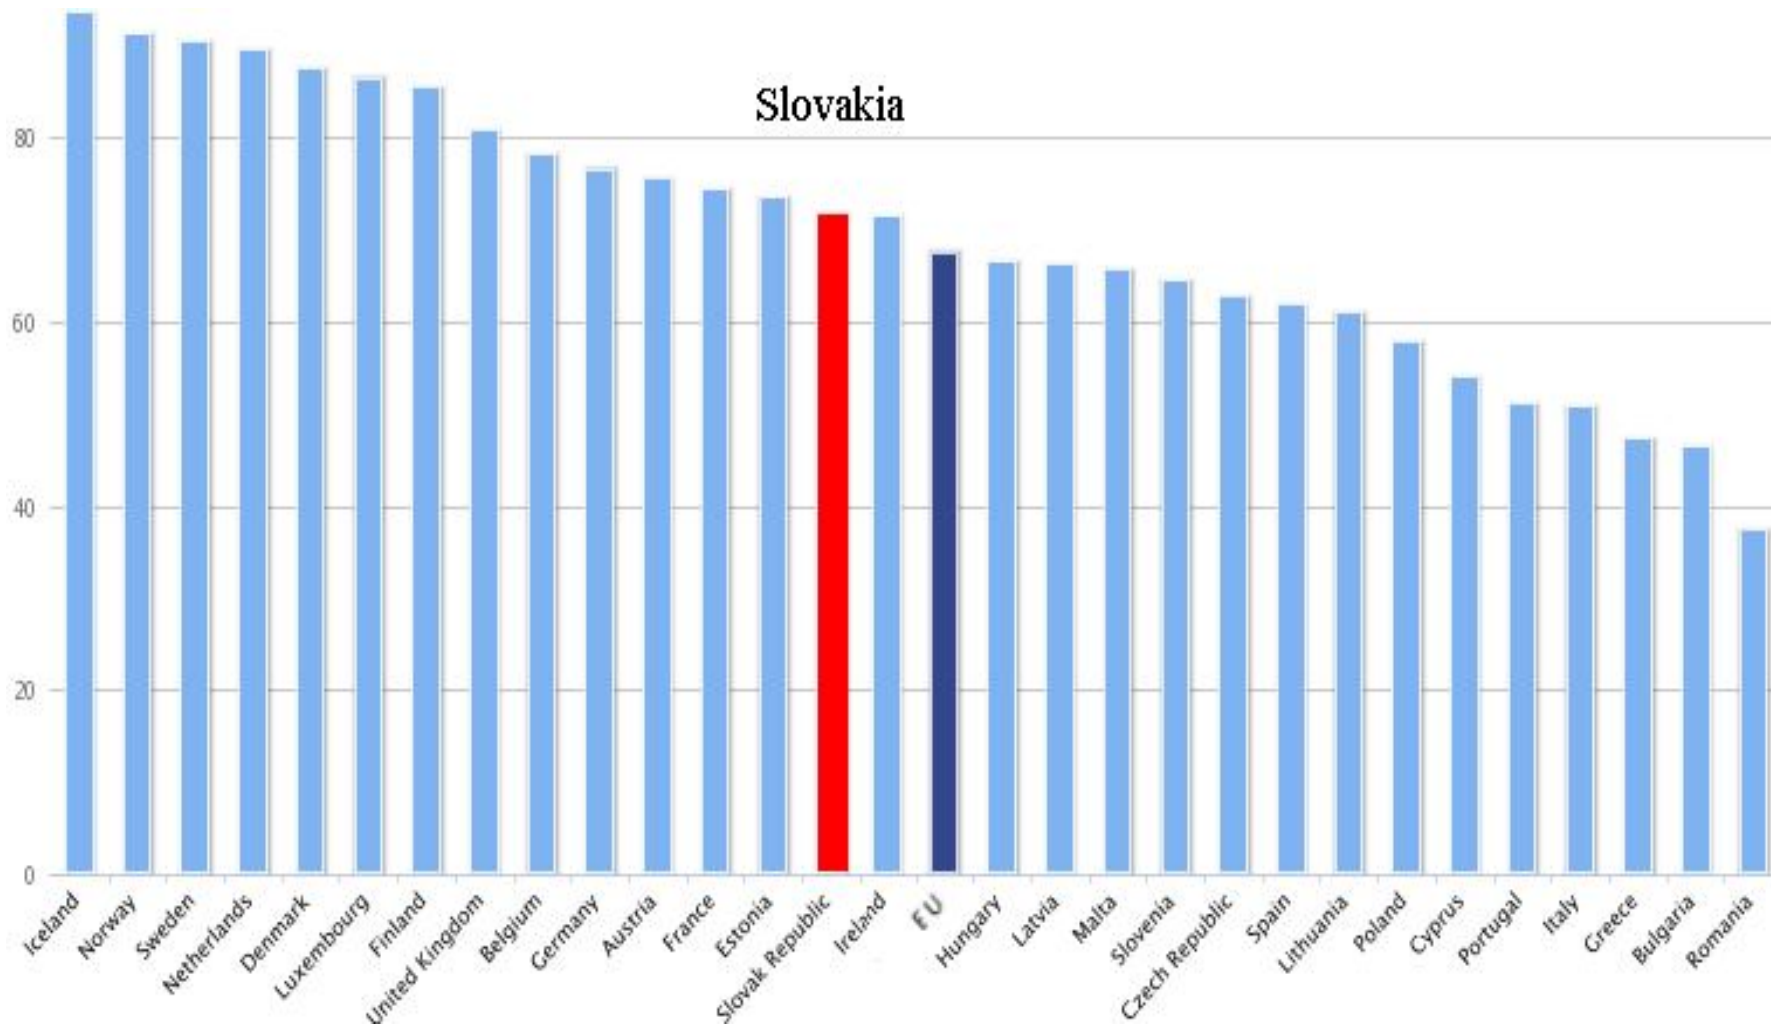

Broadband take-up (lines/100 people)

% of population who are regular internet users

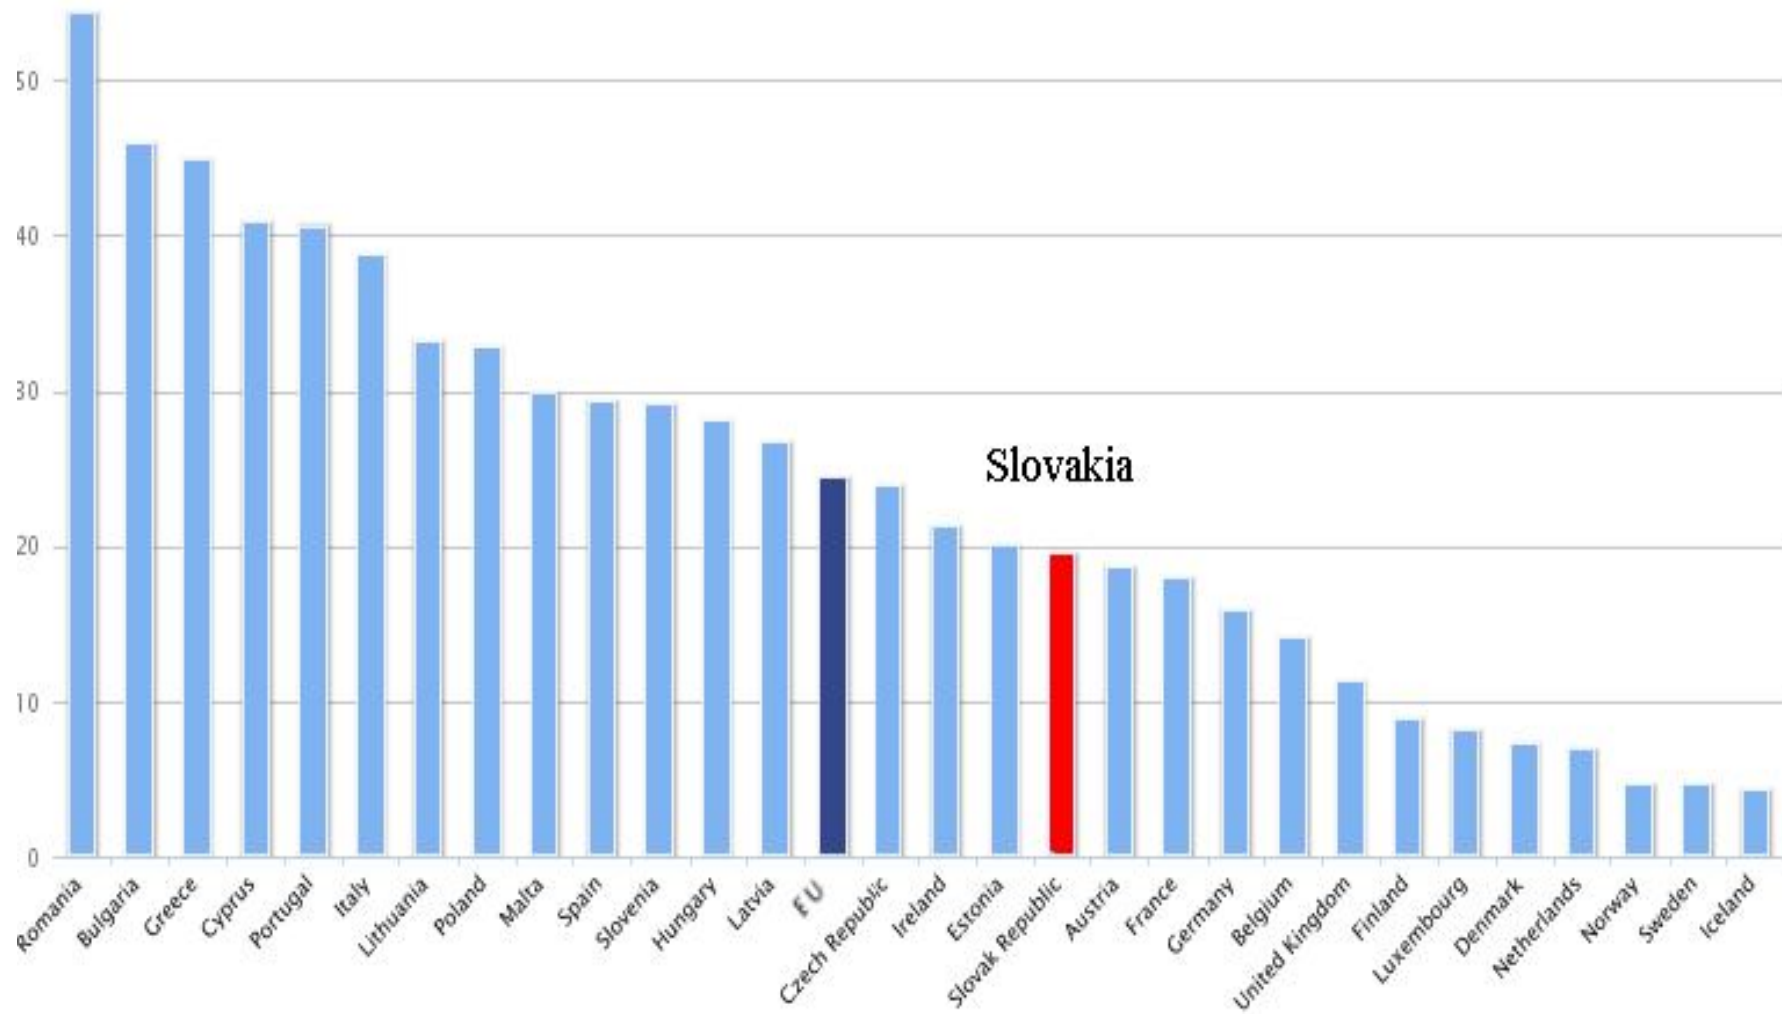

Slovakia at 72%

% of population who have never used the internet

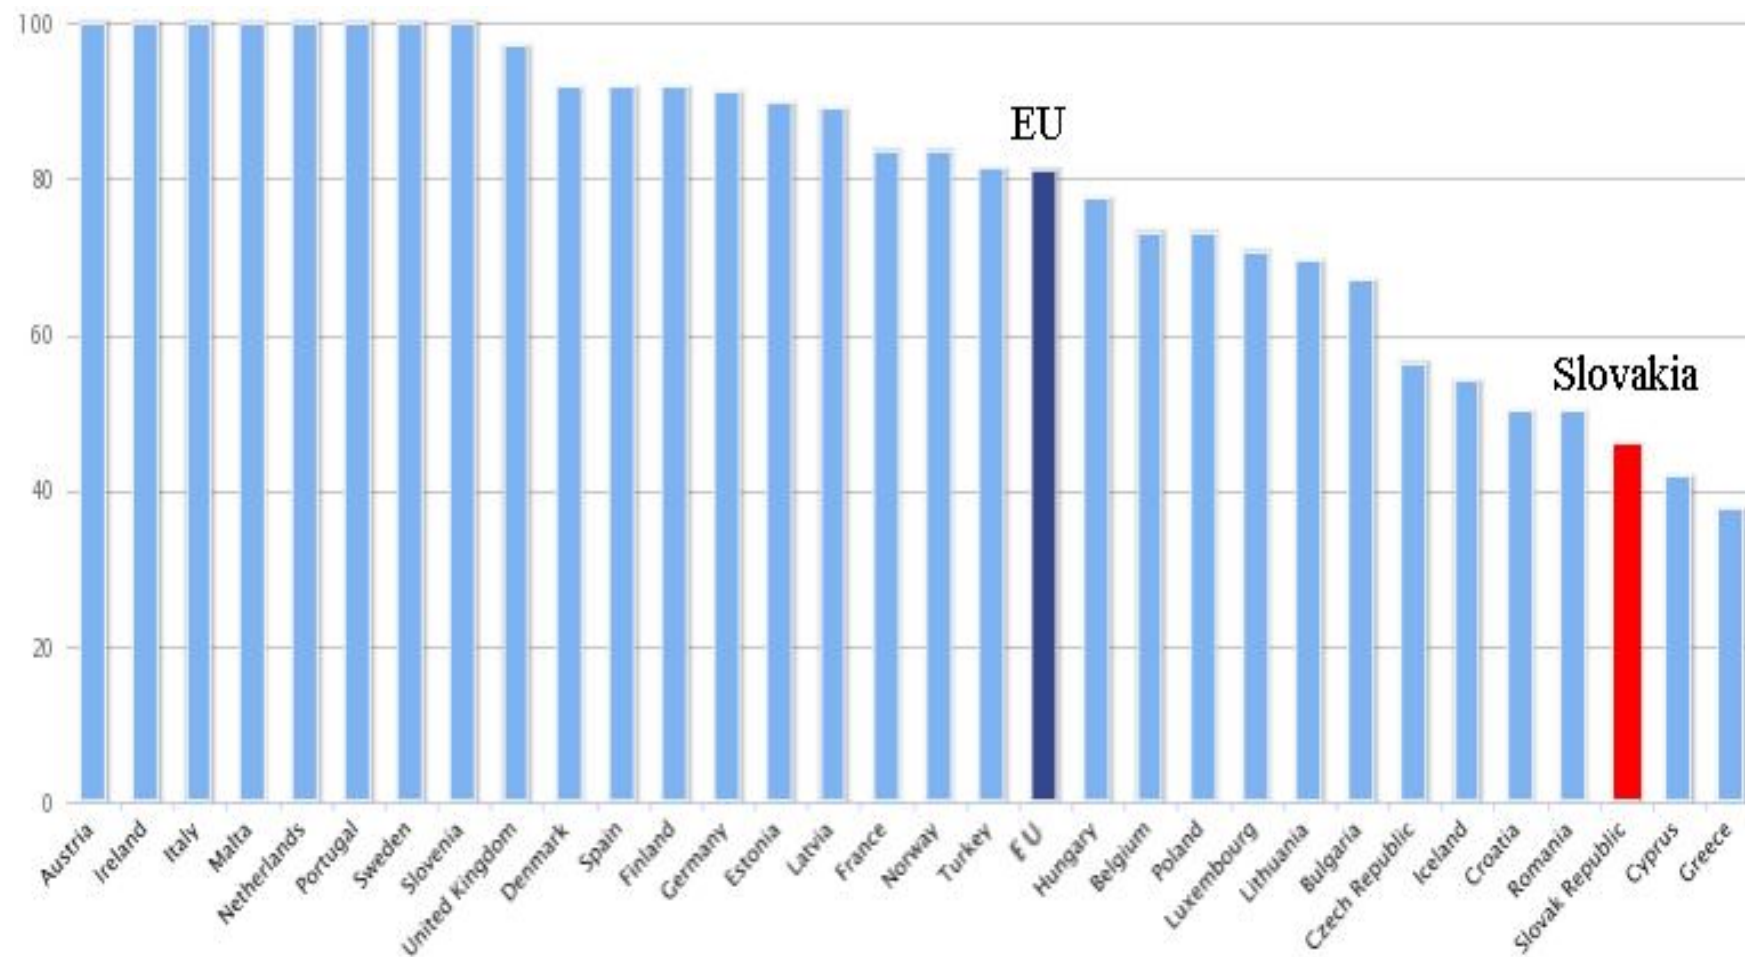

Slovakia at 20%

% of public services for citizens available online

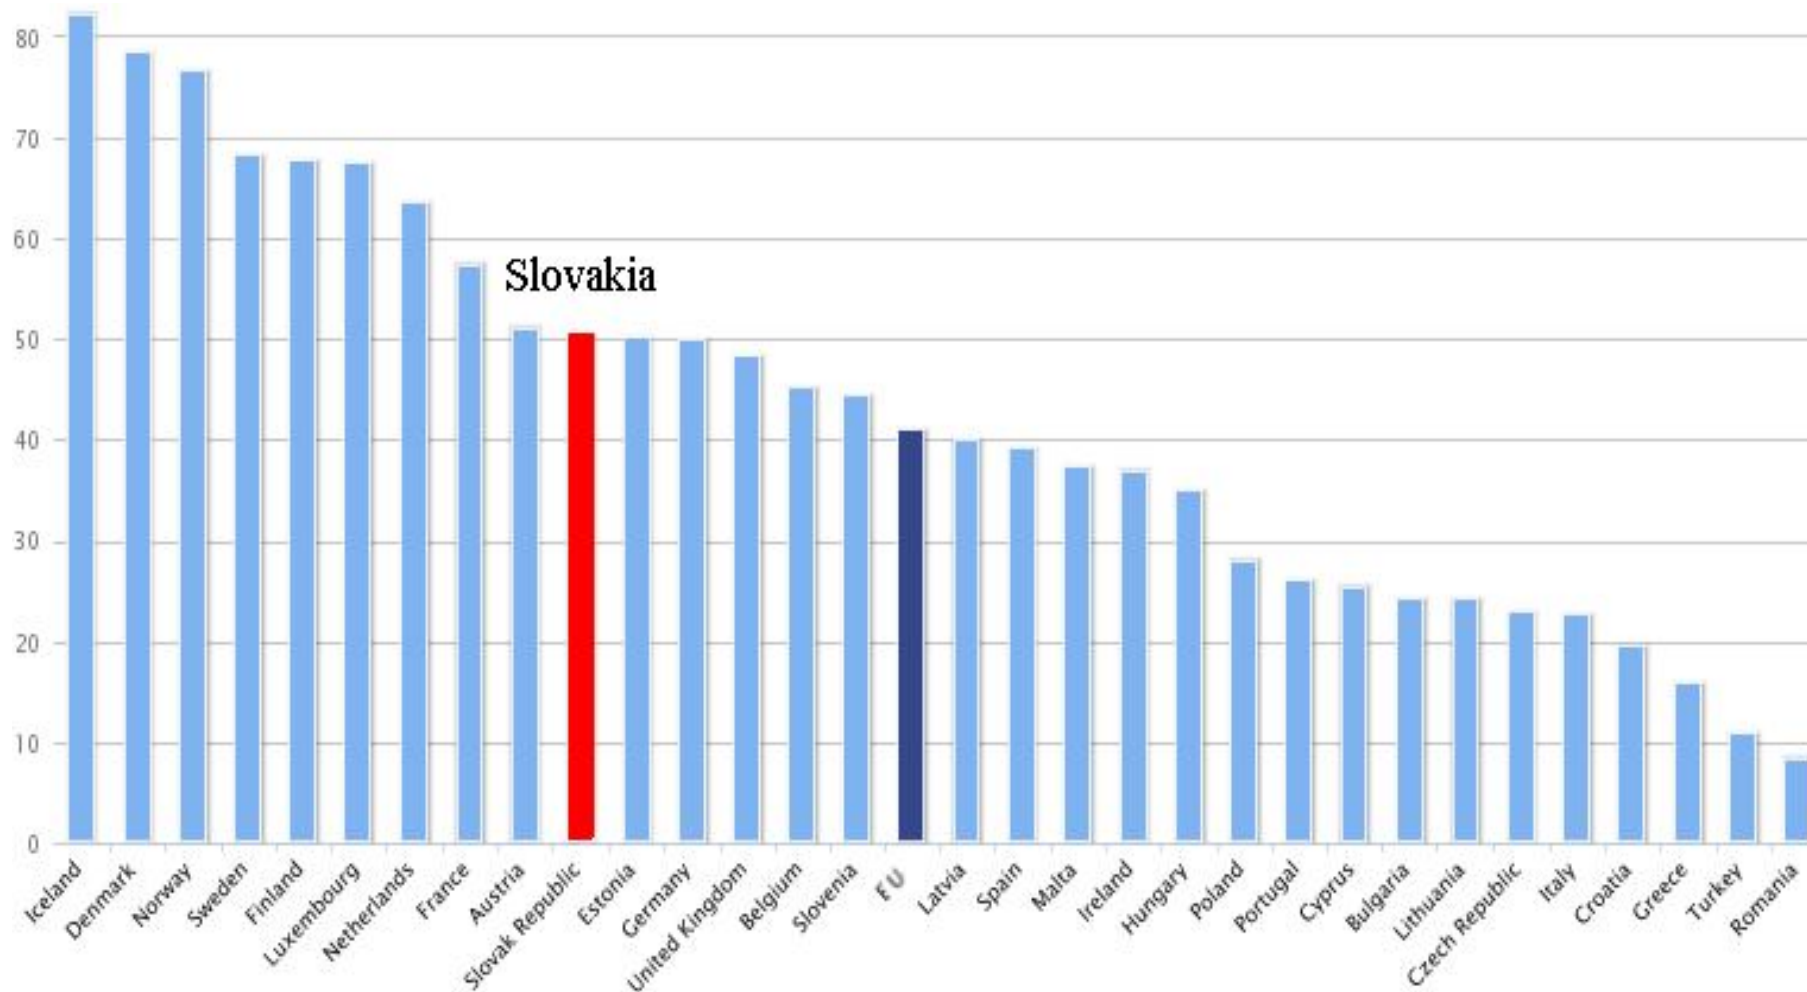

Slovakia at 46%

% of population interacting online with public authorities

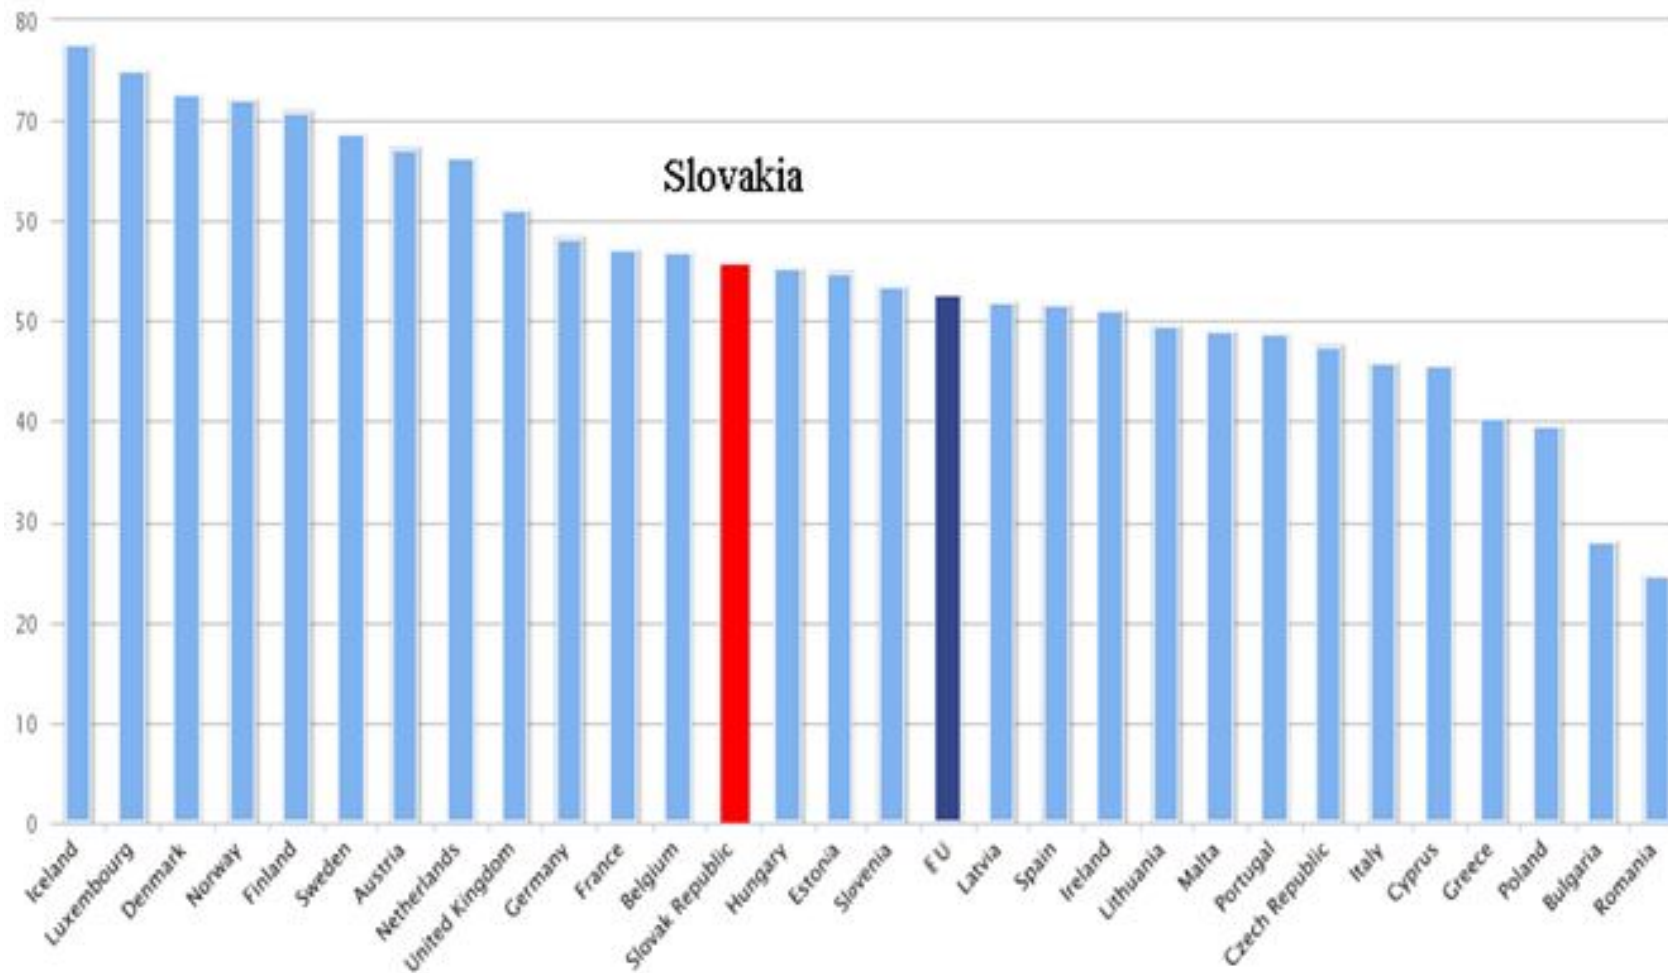

Slovakia at 50%

% of population with high or medium computer skills

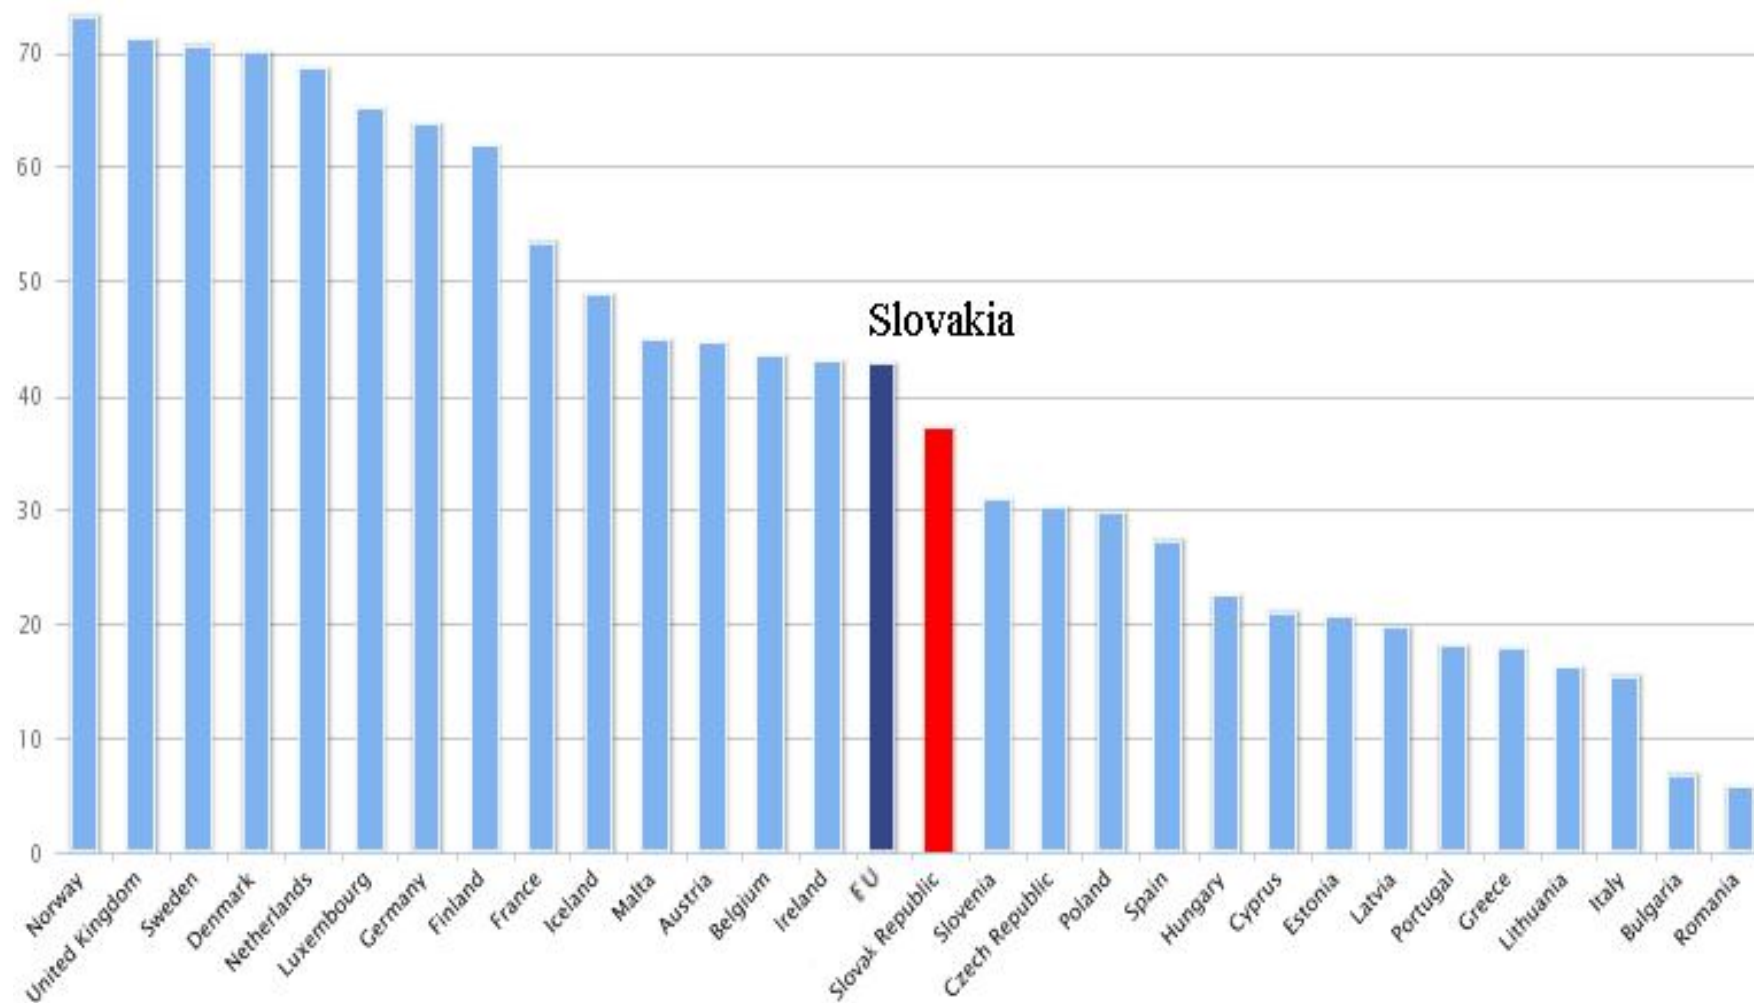

Slovakia at 56%

% of population ordering goods or services online

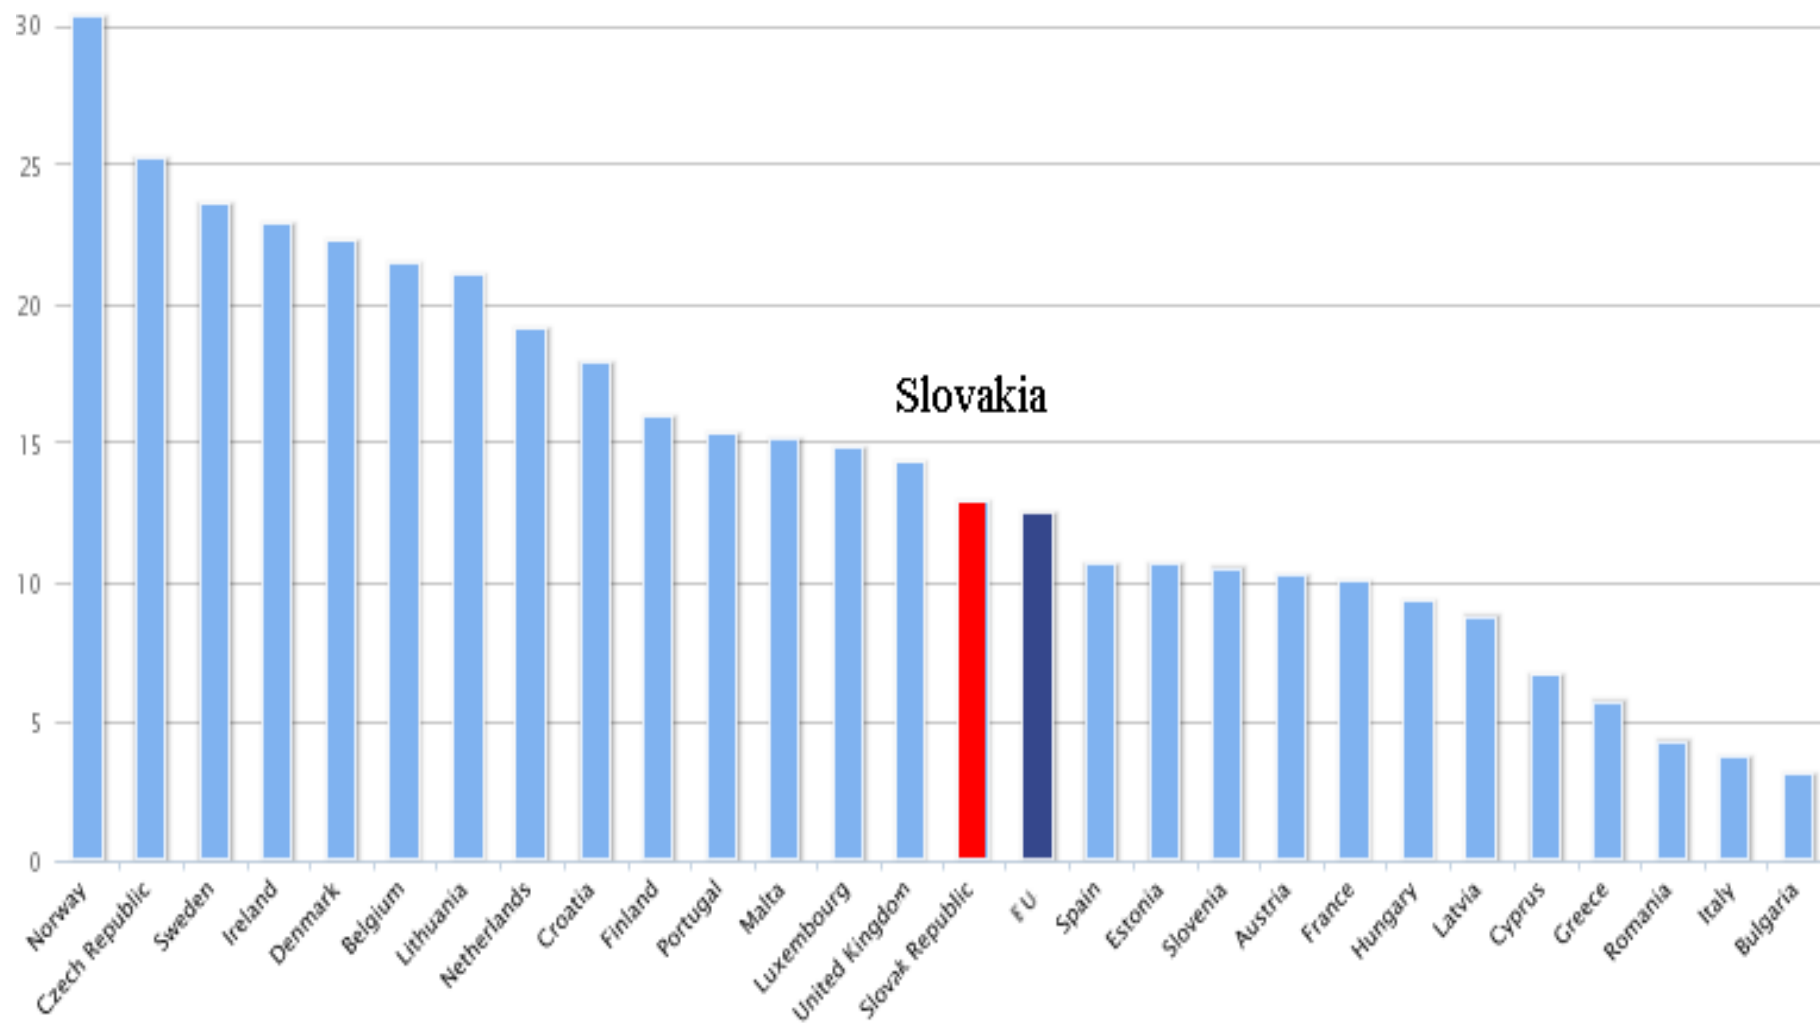

Slovakia at 37%

% of SMEs using computer network for sales

Slovakia at 13%

Broadband impacts and spillovers

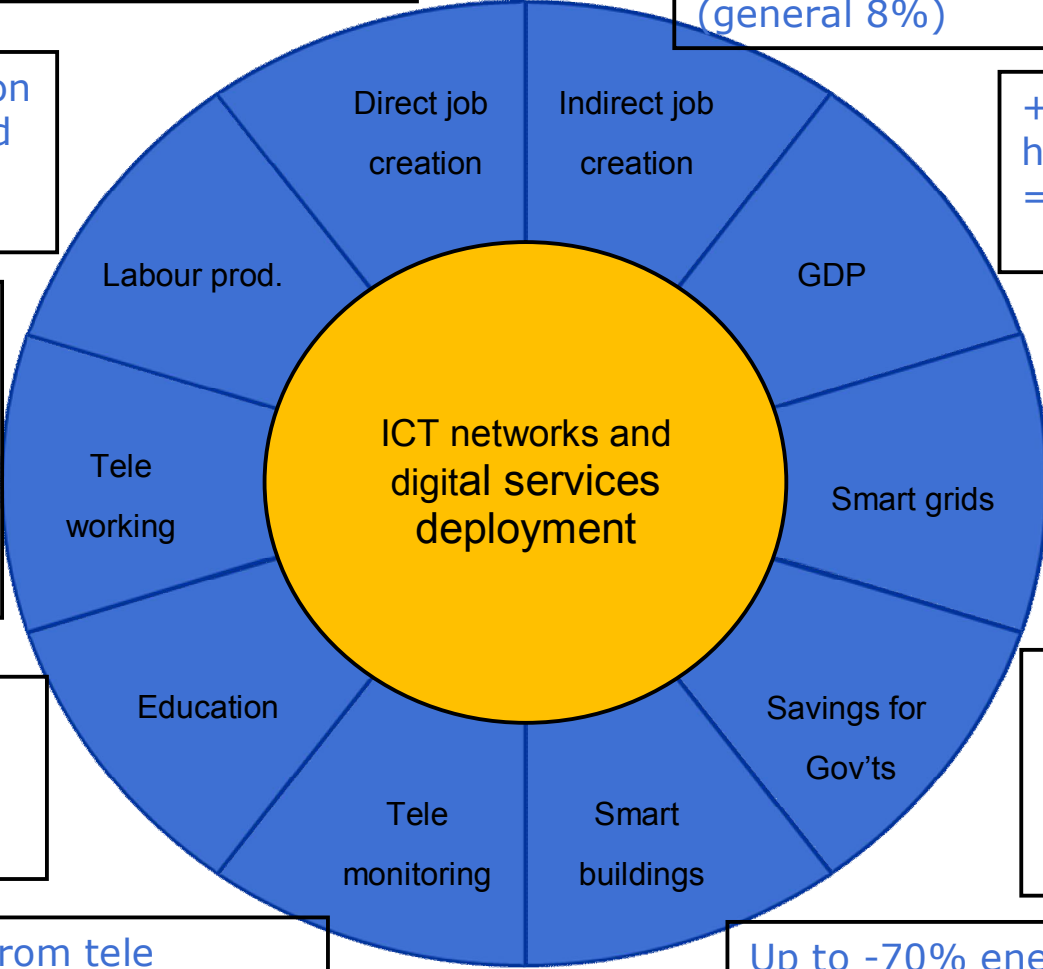

+2.7 m. man-year jobs and €152 bn. of added value to the EU economy

Bb coverage accelerated the take-up of entrepreneurship in ICT by 54% (general 8%)

+10% bb penetration => +1.5% lab. prod growth

+10% in bb household penetration => +0.9-1.5% GDP

Homeworkers took on average a 1/4 days sick leave a year than their office attending counterparts

Bb-enabled smart grid services => €850 bn. in gross energy savings (US)

+5% bb => + \$4.3 bn. GDP and +40,000 jobs in education in the US

157 m€/year in ES from eCadastre. EU wide E-procurement: €50 Bn. savings

€27.89 bn. benefit from tele monitoring/e-health (0.299% of EU GDP)

Up to -70% energy use in new office buildings using broadband connections

Conclusions

- Slovakia still lags behind in reaching some of the Digital Agenda targets, especially on broadband
- The re-programming of funds away from the broadband project will put the basic broadband target of 2013 at risk
- Broadband is a key enabling tool critical for the competitiveness of Slovakia
- The Commission actively supports Slovakia to overcome the implementation difficulties, advance the ICT and broadband projects and prepare better for the next programming period

Thank you
