Though software integration is a pain.

It is...

...time consuming

→ Need to learn target systems /interfaces

...costly

→ Manual deep drilling into Infrastructure

...risky

→ Damage to sensitive data

...complex

→ Capacity demand difficult to estimate

Our Idea -
The Simple Integration Solution

Covering …

…all needs

→ data, files and BPM, synchronisation, integration and migration

### …old and new technologies

→ on prem, Cloud, hybrid, from Mainframe to Mobile Apps

…fast and reliable

→ scalable, no single point of failure, proven technologies

…flexible and cost effective

→ very attractive price models, saving up to 90% time & money- 50% guaranteed!

Our SQL Syntax commanded platform reduces necessary time, money and risk. Significantly.

Example: Deep Integration from SAP and Microsoft Exchange Server

Atos MyCity

xRM Pandemic Management

Preview: Cooperation with ATOS, official presentation at Smart Cities in Barcelona next week.
About needs of Cities included existing Systems-XRM from Microsoft and mobile Solution
