# The Century of Cities

Everyone is talking Smart, but what does this really mean?

Smart begins with IOT

And a fast approaching world where computers are everywhere ....
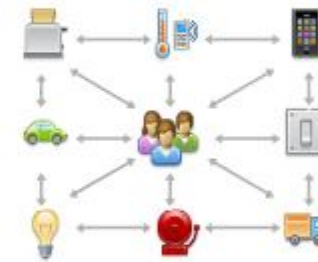

Smart is a world where 'we' are the data hub

Smart is billions of intelligent, connected devices

The Internet of Things is coming soon

'15 billion intelligent, connected devices by the year 2015'

The Embedded Internet, **IDC**, Jan '09.

m2m **IoT**

we are here
