Issues from users or industries

Outline

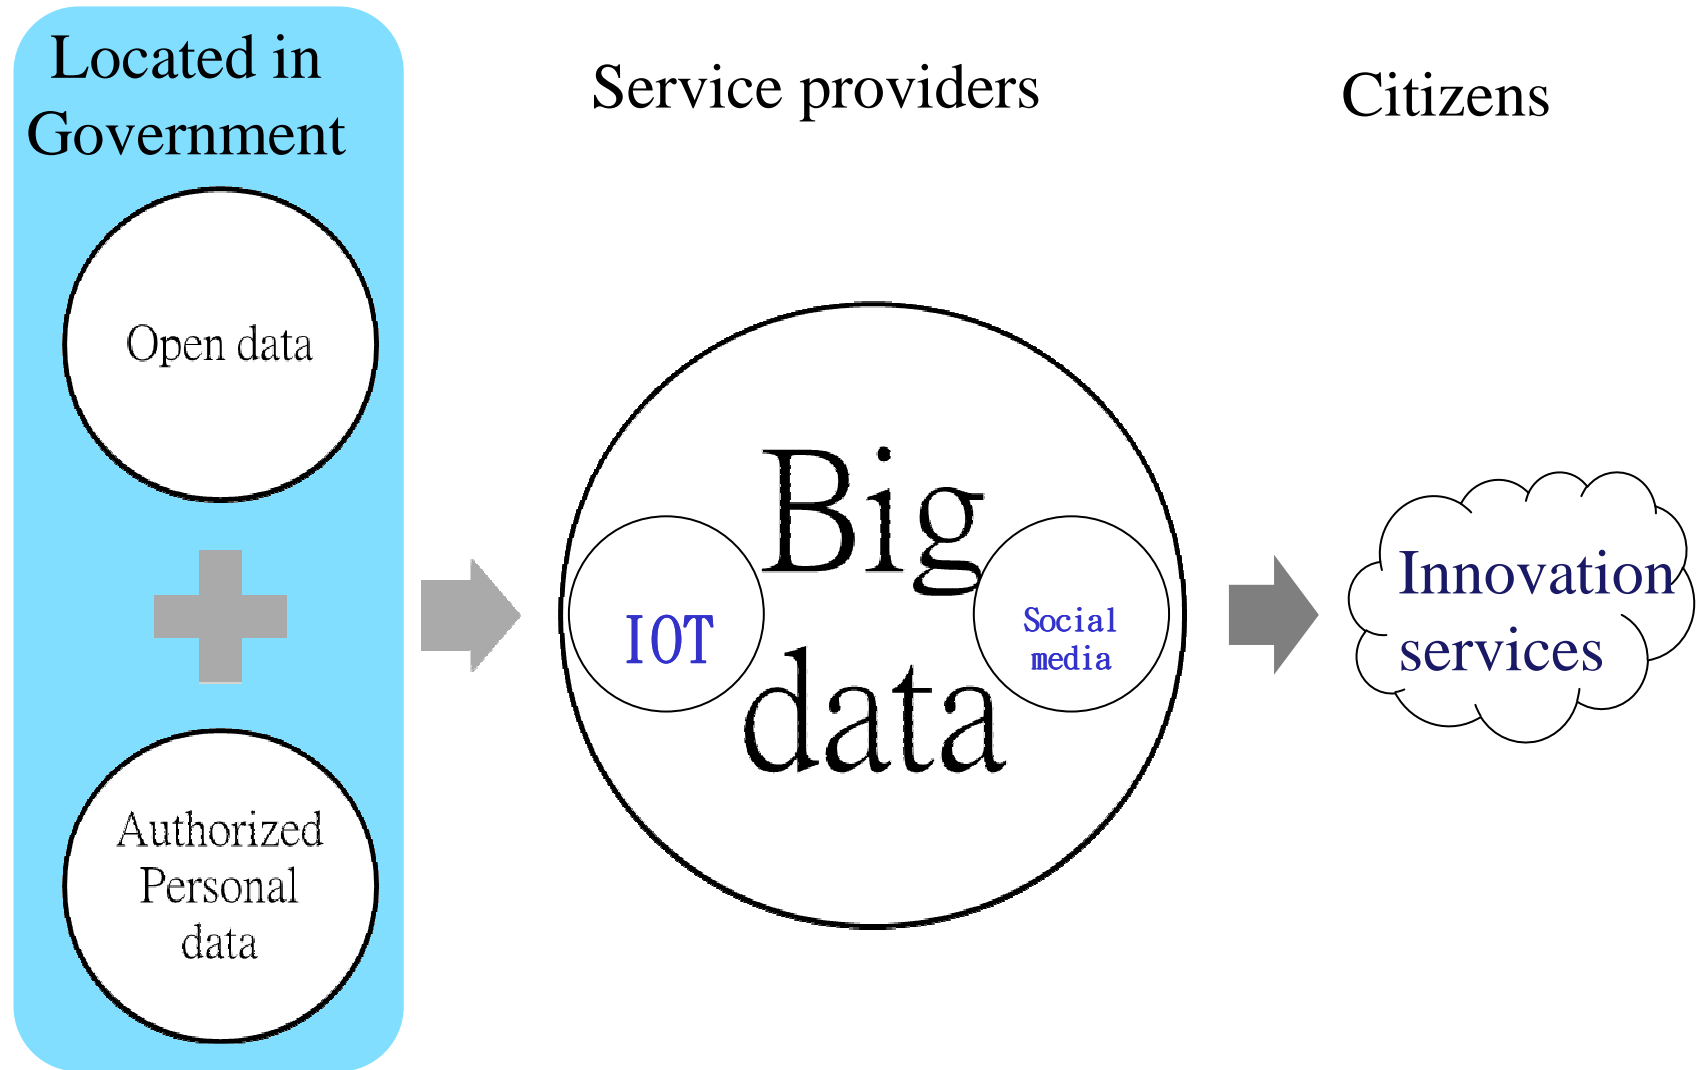

Cloud Strategy

Current State of Government
Cloud

Future Work

From Open Data to Big Data

Conclusion

- We value the citizens' needs and industrial opportunity in the world simultaneously while developing cloud strategies
- How to maximize the value of government-owned data and engage with citizens are the main work at next stage
- We aim to make our government more transparent and our citizens more smart by keeping on releasing the data belonging to them

**Smart
government**

Data, rights, power

**Smart
citizens**
