

Hospital projects

from JASPERS perspective

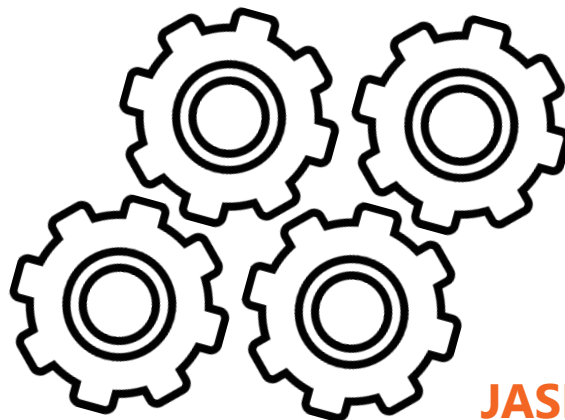

Adam Kozierekiewicz MD, PhD

Working together

Beneficiaries – project owners, planning, preparing and implementing projects.

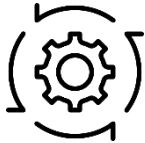

The EC – setting and implementation of EU policy. Setting up and shared management of financial support programs.

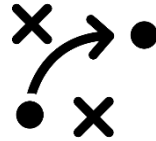

The EIB – lending institution of the EU. Provision of loan financing for projects. Support and implementation of dedicated EU policies.

JASPERS (joint EIB-EC initiative implemented within EIB structure) – support for beneficiaries in project preparation. Tailored advice for specific projects, horizontal support for project development.

JASPERS Services

Support for the development of projects – methodological guidance, advise, project appraisal

Advice on horizontal issues

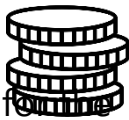

Assistance in **preparation of sector strategies, plans**

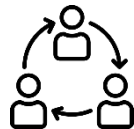

- Health project 2014-2020:**
- 17 projects incl. 7 hospitals in:
BG, CR, LT, PL and RO
 - EUR 1,5 billion

And:

- e-Health
- Medical universities and R&D

Support for the preparation of **programmes and schemes**

Selective **support to project implementation**

Capacity building
- networking, training, knowledge transfer

Steps applied for project preparation

European semester and country specific recommendations

“Excessive reliance on hospital care hinders the efficiency of the health system.”

“A comprehensive reform for modernising the hospital network has been put on hold.”

“State-owned hospitals continue to accumulate debt despite recurring government bailouts.”

“Despite government action, current weaknesses in primary care limit Slovakia’s potential to improve health care quality and efficiency.”

“Current and expected health workforce shortages are significant, especially for GPs and nurses.”

“Financial resources and a systematic vision of how to meet the increasing demand for long-term care are lacking.”

Not obvious issues in hospital projects

- Health strategy – mid and long term vision
- Current and future role of the hospital in the region and the country
- Co-operation with other facilities
- Quality and microeconomic efficiency
- Change and its management
- Hospital as a medical care-provider, training and research entity
- Climate and environmental context
- Pandemic and other resilience measures
