

Microsoft

National Cloud
Impact for Efficient Government
satisfied citizens

Razzaq
Director of Cloud Services, CEE Public Sector
October 2014

Clouds come in different shapes

The need for Hybrid Cloud

Public Clouds

Managed in data centers
by Service Providers

Agile
Cost effective
Scalable

Private Clouds

On-premises or hosted
by an in-country service
provider:

- Can be more secure
- More customizable
- Greater control
- More overhead

Hybrid Clouds

Optimal mix of cost and
control

- Agile
- Scalable
- More secure
- Cost effective

Emerging National Cloud Strategy Focus

Liikenne- ja viestintäministeriö

Australian Government
Department of Broadband, Communications and the Digital Economy

European Commission

European Cloud Computing Strategy

European Commission > Information Society > Activities > European Cloud Computing Strategy

Digital Agenda:
Cloud Computing Strategy

The European Commission endorsed a communication on "[Unleashing the Potential of Cloud Computing in Europe](#)" intended to create a friendlier and more active environment for 24/7 access to computing power and content.

18:00 – 21:00	NETWORKING EVENT

Why should you consider National Cloud?

1 Trasformative

Significant cost base reduction

Flexible licensing structure

Deliver time saving services to employees to improve productivity

Automate processes which reduce waste and overhead

2 Creating a service culture

- Agility – deliver new services at speed
- Creating a service culture in IT – service oriented approach
- Meet the need of Citizens - Deliver a roadmap of citizen services that save time and money for citizens and justify taxes

3 National Competitiveness

- Build IT skills and capabilities
- Support Local IT industry
- Legal & Regulatory requirements to keep data within country
- Need to retain certain sensitive data in Country (National Interest)

Example of a National Cloud vision – Ireland
